

## ROTARY MODEL UN

### RECOMMENDED STUDENT RESEARCH TIMELINE

1. Background Research on your Country – during the months of January and early February

See Lloyd Sabin's suggested outline (attached).

2. Focused Research on all 2 Resolutions – during the month of February

Determine your country's position on the various Resolutions and find support for that position (through your research materials).

3. Drafting of Sponsored and Supporting Speeches – during the month of March

State and support why your country is in favor of or is opposed to the various Resolutions or parts of the Resolutions. Explain why you support or oppose particular paragraphs of the Resolutions, and where you oppose, recommend changes thereto. Assist the students in revising and finalizing their speeches.

4. Practice Speeches – during the end of March and early April

Have the students practice their speeches as often as possible. Time their speeches and delete or add content so that their speeches do not exceed the maximum time for sponsoring speeches and supporting speeches (the maximum length of a sponsoring speech and a supporting speech will be provided to advisors and students shortly). Invite the students to give their speeches at your Rotary Club meeting before the MUN conference.
